

SCHOLARSHIP RECIPIENT 2021/2022

TARIC MILES

Institution: Champion College

CAPE Subjects Pending: Biology, Chemistry, Communication Studies, Economics, Pure Mathematics

Career Aspiration: Medical Scientist because I believe that my passion for Biology, curious, open-minded and detail-oriented personality and desire to contribute to the common good makes this career perfect for me.

Internship Experience: *During my time as an intern at e-Biome, I got the opportunity to attend and participate in STEM and environmental conferences, publication training sessions and lectures at the University of the West Indies. These were very stimulating and gave me a chance to gain new knowledge and learn new skills. My favourite part of the experience, however, was the mentor pairing. My mentor checked up on me constantly, provided great advice and offered a lot of help. To sum it all up in one word, my internship experience with e-Biome was incredible.*
